

You will find below the tutorial to make the Picardy plates, but adjustments can be made if you do not have the equipment or skills to do it. The dimensions are indicative.

You can recycle wood for the construction as shown in the example

- A panel of raw wood or plywood 18 mm or 20 mm thick and 50 x 200 cm in size or a large or two small wooden tables well waxed
- A panel of raw wood or plywood 15 mm thick and measuring 60 x 100 cm

The tools, machines and consumables needed to make the game:

- various pieces of wood
- a jigsaw or hand saw or router
- sanding paper of different grits (80 and 120) or a sander for the large board
- ruler or tape measure, compass and pencil
- a paintbrush
- wood paint in 2 colours
- linseed oil with a cotton cloth
- beeswax or similar with a soft cloth for polishing

The stages of the game construction in pictures :

1. Collect a wooden board to make the game board.
2. Cut the 60 cm by 1 m panel into 16 15 cm diameter discs using a router. For the jigsaw or hand saw, it is necessary to trace the circles with a pencil.
3. Sand the discs to remove varnish or unwanted colour.
4. Make two groups of 8 discs and choose a colour for them.
5. Colour only one side of the two groups of discs as shown in the photo.
6. Apply linseed oil to the cloth to protect the wood.
7. Cut the tray to the desired size. Here we used a panel measuring 215 x 50 x 2 cm.
8. Sand the tray with a sander.
9. Wax and polish with a soft cloth as well as if you use a board or one or two wooden trays.

Good manufacturing!
